WARNING

GENERAL SAFETY – ROTATING CABLES AND EQUIPMENT

DANGER!!!

TO PREVENT SERIOUS BODILY INJURY AND TO AVOID DANGER FROM ROTATING CABLES AND EQUIPMENT:

1. **USE CAUTION AT ALL TIMES.** Cable can twist or kink and cause serious injury. Fingers or other body parts can be caught in rotating parts.
2. **NEVER** handle any cable under tension. Relieve all tension build up before attempting to handle cable.
3. **DO NOT** continue to operate machine when cleaning tool becomes stuck in an obstruction. **Excess torque on a cable could cause it to fracture.**
4. **NEVER** force a tool and cable into a pipeline blockage.
5. **ALWAYS** wear **HEAVY** leather gloves and safety glasses when operating machine.
6. Use correct tool for the job or applicaton. Check the tool listing for the correct tool and line size.
7. To maintain safe and efficient operation, thoroughly clean all cables with water after use. Acids in the drain and sewer lines attack and deteriorate the metal of the cables and tools.

Customer Safety and Operation Guide

Electric Eel Model K 50 Ft. Manual Snake

Customer Safety and Operation Guide

Electric Eel Model K 50 Ft. Manual Snake

Follow the steps below to operate the tool

Step	Action
1	Place unit within 3 feet of drain opening.
2	Attach spear head tool to the cable with set screw and allen wrench.
3	Loosen chuck by turning thumbscrew counterclockwise.
4	Pull out approximately 12" – 16" of cable and insert into drain line.
5	Turn crank handle on unit clockwise until exposed cable has entered drain line.
6	Repeat steps 4 and 5 until obstruction has been cleared.
7	If possible, keep water running through drain line to help flush out debris.
8	Hand feed cable back into unit.
