

MiniFlex[®] 2

Your Curving King!

Known as the “Curving King” this sewer camera is equipped with a unique patented flexible element between camera head and the pushrod.

It comes with a 15m or 30m cable and a bullet-shaped camera head, allowing for the examination of pipes ranging from 32mm to 80mm, all displayed on a convenient easy to view integrated video and photo monitor.

The MiniFlex serves as a pipe inspection camera specifically designed for smaller pipes, making it ideal for applications in sanitary spaces like bathrooms, kitchens, and toilets.

Negotiating multiple right-angle bends within a narrow pipe diameter is effortlessly handled by the MiniFlex. Two versions are available: the MiniFlex 19 (Ø 32-100 mm) and the MiniFlex 36 (Ø 50-200 mm)

MiniFlex[®]
CamTronics

FEATURES INCLUDE:

- ✔ Everyday Carry: the MiniFlex is light and compact
- ✔ Inspection of pipes with a small diameter
- ✔ Compact and handy housing
- ✔ Multiple right-angle bends thanks to unique flexible intermediate section
- ✔ Innovative spherical camera head for optimal throughput
- ✔ Screen size: 8"
- ✔ Clear image: minimal reflection due to lighting ring
- ✔ Wide viewing angle due to special lens
- ✔ Easy to clean
- ✔ Record video + audio and play back this content
