# WINCAN WEBFLEX

Introducing the new **WinCan WebFlex**. This essentially allows many features available in WinCan VX desktop software to be handled all online in the browser. Report creation, editing, drawing, printing, XML export, validation, client delivery and many more are included.

WinCan's WEBFlex brings desktop functionality to the cloud with all the benefits of centralized data and workflows. Device independence allows team members to easily log in and access all relevant data from anywhere – ideal for home office work or mobile devices outside the office environment.

- ✔ WinCan's WEBFlex brings desktop class functionality to the cloud with all the benefits of centralised data and workflows.
- ✔ Functionality from report creation from a simple video file to full feature scoring and reporting are all now available in the cloud.
- ✔ Admin control access and features to team members from a simple interface and control panel.
- ✔ Device independence allows team members to simply login and access all relevant data from any location.
- ✔ All data collection versions are also compatible with WEB.
- ✔ So, data from embedded systems, ProTouch or WinCan VX are all easily connected to WEB.
- ✔ No more dongles
